## Financial Benefits

### Saves you money

Gas Tank Hire saves your working capital and allows you to preserve your current financial lines. Equipment purchases reduce your cash, or increase your debt. Gas Tank Hire enables you to acquire new equipment for your business without the need to change your existing financing plans. A rental plan can be tailored to your needs.

Gives you lower monthly payments and protects you from owning obsolete equipment. A Gas Tank Hire contract is typically cheaper than traditional finance lease and commercial hire purchases as you do not need to make a lump sum payment at the end of the lease period on what may become outdated equipment.

### Gives you flexibility and choice

Gas Tank Hire lets you add equipment to your existing contract, or upgrade to new technology. Your term can remain the same, or you can seek approval for an extended term. Forget wasting time in trying to dispose of outdated equipment at the end of the lease, because Gas Tank Hire lets you:

1. Simply return the equipment to us with no further obligations. You can then apply to rent replacement equipment from us.
2. Continue to rent the equipment under the same contract.
3. Apply to restructure the contract on new terms.
4. Offer to buy the equipment at fair market value.

### Gives you a 100% tax deduction

Rental payments used for business purposes are treated as operating costs and are generally 100% tax deductible.

### Gives you a quick answer

Our rental specialists will personally look after your completed application and once we have all necessary information, an answer is given within hours, not days.

### Our Mission

- The customer is the first priority.
- Without customers we have nothing.
- Technology and science alone will bring you nothing. It must be applied to a practical use, to benefit the customer.
- The company must work with the customer to give them the best and most practical solution.
- It must be win win for the client and us.
- There is nothing we can not achieve for the client.
- The customer must make more profit by dealing with us.
- We must give them something they can not achieve themselves.
